SHAPING CHANGE AT HEXAGON METROLOGY

The individual brands that compose Hexagon Metrology have been around for decades, in some cases over a century. They are the names you know and trust in the metrology industry. We are proud of our heritage and what Hexagon Metrology means today, and we are determined to continue to provide an authentic experience reflective of a company deeply rooted in technological innovation.

In order to align ourselves more closely with the strengths and synergies of our parent company, Hexagon, we have launched a rebrand of Hexagon Metrology. The updated brand strategy, which positions Hexagon Metrology as our primary go-to-market brand, showcases our unity and shared commitment to Hexagon's renewed focus and refined vision. This marks a new chapter in our history.

We believe the new brand captures our essence and will allow us to further leverage our strengths as a world-class metrology innovator. As your global partner and the people committed to your success, we will continue to evolve, grow and build upon our capabilities as we look toward the future.

We are Hexagon Metrology – Where quality comes together

OUR EXPERTISE IS YOUR ADVANTAGE

At Hexagon Metrology, we are committed to enabling our customers to fully control their processes, enhancing the quality of products and increasing efficiency in their plants around the world. We empower you to stay one step ahead of a changing world with our breadth of product offerings, our nearly 200 years of expertise and our wide geographic coverage.

SERVICES

We provide support that extends far beyond our product offerings. Our local experts in more than 70 Precision Centers are at your service for training, consultations, part programming, contract inspections and system rebuilds. Leverage our global service network to your advantage.

SENSORS

Our vast array of sensor technologies provides a completely integrated system for measurement professionals. Built utilizing laser, tactile, optical and white light technologies, our sensors facilitate critical decision making. Trust our selection of precision sensors to meet your needs.

SOFTWARE

We develop and maintain the most popular metrology software in the world, with tens of thousands of licenses in use worldwide. Our software makes it easy for companies to create and share manageable multidimensional data that fosters innovative thinking. Use our wide selection of software to solve tomorrow's problems today.

SOLUTIONS

The synergies we have developed between our software, hardware and services help to create a complete package for you. Instead of using a standard product to fit your needs, we customize a solution based on your unique application. Ask us how we can creatively help solve your most challenging metrology problems.

SECTORS

Our professionals are experts in their specific industries and understand your diverse needs. Working collaboratively in multiple industries creates synergies that empower you to shape change. See how we actively work for your success.

Hexagon Metrology offers a comprehensive range of products and services for all industrial metrology applications in sectors such as automotive, aerospace, energy and medical. We support our customers with actionable measurement information along the complete life cycle of a product – from development and design to production, assembly and final inspection.

With more than 20 production facilities and 70 Precision Centers for service and demonstrations, and a network of over 100 distribution partners on five continents, we empower our customers to fully control their manufacturing processes, enhancing the quality of products and increasing efficiency in manufacturing plants around the world.
