Leica ScanStation P20
Industry's Best Performing Ultra-High Speed Scanner

Unprecedented performance in ultra-high speed laser scanning

Productivity and Accuracy
An innovative combination of advanced time-of-flight range measurement plus modern Waveform Digitizing (WFD) technology enables the compact Leica ScanStation P20 to achieve ultra-high scan speeds and low-noise performance at extended range (to 120 m). Together with high-accuracy angular measurements and survey-grade tilt compensation, Leica ScanStation P20 delivers unprecedented ultra-high speed scan data quality for as-built and scene surveys.

Scan up to 1 million points per second
Leica ScanStation P20 is the ideal instrument when very short time windows are available for capturing High-Definition Survey™ data or when ultra-high density, full dome scan data is needed for client deliverables.

Unmatched environmental capabilities
Developed and manufactured by Leica Geosystems, Leica ScanStation P20 lets users apply ultra-high speed scanning in operating temperatures ranging from −20° C to +50° C. Moreover, with an Ingress Protection rating of IP54 and an eye-safe laser class 1 rating, users can reap the benefits of ultra-high speed scanning for even more sites and projects.

“Check & Adjust” for added confidence
Leica ScanStation P20 is the first laser scanner to feature a valuable “Check & Adjust” capability. Instead of sending the instrument to a service center, users can electronically check the accuracy of their ScanStation P20 themselves and automatically adjust instrument parameters to ensure the highest level of performance.
